EDUCATION

Royal University of Phnom Penh — Graduated in 2025
Bachelor of Science in Computer Science and Engineering (GPA: 3.08)

WORK EXPERIENCE

Frontend Developer | BacknBold Studio (labs.backnbold.com)
Nov 2025 – Aug 2026

Project: RunBodia (runbodia.com)

- Developed the frontend for Cambodia's marathon event platform, including event discovery, registration, and payment flows.
- Supported a free marathon event with **250 real registered users**, improving digital registration efficiency over manual paper tracking.
- Implemented bilingual English/Khmer support with custom font handling for Khmer script.
- Built offline-resilient registration forms with local storage persistence to reduce data loss during unstable network conditions.
- Built with Next.js, TypeScript, and Tailwind CSS.

Project: ChatEaver (chateaver.com)

- Built SEO-optimized documentation pages with proper metadata, JSON-LD structured data, and semantic heading hierarchy.
- Developed a fully responsive layout using Tailwind CSS v4, including container queries and Flexbox/Grid.
- Improved the documentation reading experience through clearer typography, navigation, spacing, and interactive components.

Personal & Voluntary Projects

Full-Stack Developer | MijuDrama
July 2025 – Feb 2026

Personal Project: MijuDrama (mijudrama.com)

- Designed, built, and launched an Asian entertainment discovery and editorial platform for dramas, donghua, and manhua.
- Scaled production traffic to **100–200 daily active visitors and 2,000–5,000+ total unique visitors** within 3 months of launch.
- Engineered core features including multi-API catalog integration (TMDB, AniList), personal watchlists, user ratings/reviews, custom public lists, and community discussion forums.

- Leveraged AI-assisted workflows (Claude Code, OpenAI Codex) for rapid spec-driven development, type-safe API integration, and automated code verification.
- Built using Next.js 15, React 19, TypeScript, Prisma, MongoDB Atlas, Upstash Redis caching, and better-auth.

Volunteer Frontend Developer | Voting Platform (Australian Centre for Education)

- Worked with Mr. Chikheang and launched the digital voting web app **2 exhibition events (2025 ACE Children's Day & Open Day's Poster Competitions)**, replacing physical stickers with real-time digital vote counting for parents scanning QR codes.
- Built using Next.js, MongoDB, and shadcn/ui.

My Portfolio (bunseueng.netlify.app)

- 4+ years of personal project development; built 6+ production-ready web applications.
- Specialized in modern frontend frameworks and full-stack development.
- Experience with 3D web graphics (Three.js), animations (Framer Motion), and responsive UI/UX design.
- Deployed applications on Vercel and Netlify; proficient with version control and CI/CD workflows.

SKILLS

Frontend:
. Next.js, React, Vue.js, Nuxt.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion

UI & Forms:
. Shadcn/ui, Radix UI, Material UI, Ant Design, TipTap, Lexical, React Hook Form, Zod

Backend:
. Node.js, Express.js, Next.js API Routes, FastAPI, Prisma ORM, REST APIs, NextAuth.js, JWT Authentication, Payment Integration (Stripe, PayPal)

Databases:
. MongoDB, PostgreSQL, Supabase

Developer Tools:
. Git, Docker, Postman, Vercel, Netlify, Cloudinary, Claude Code, OpenAI Codex

Performance & Analytics:
. TanStack Query, SEO Optimization, XML Sitemap Generation, PostHog, Vercel Analytics

Languages:
. Khmer (Native), English
